Overview

Whether or not you are installing crown molding will determine where you hang your glass rack. If you are NOT going to install molding, mount the glass rack so that the top edges of the wine racks align with the top edge of the glass rack.

If you ARE installing crown molding, install hanging glass racks with scallops 6" below the top of the adjacent racking. This will allow enough room to insert a wine bottle above the stemware rack.

Or, if you purchased the arched stemware rack, mount it flush underneath the molding:
